PROFILE SUMMARY

Informatics Engineering fresh graduate and former Machine Learning Developer Intern (5 months, Widya Analytic). Builds NLP and ML systems end to end, from fine-tuning transformers to deployed APIs, with strongest skills in Python, NLP, RAG and MLOps. Seeking an entry-level AI or Machine Learning Engineer role.

EXPERIENCE

Machine Learning Developer Intern – Widya Analytic (PT Widya Intelektual Bangsa) Aug 2025 – Dec 2025

IT consulting company for Odoo ERP customization, big data and AI *Yogyakarta, Indonesia (Hybrid)*

- Delivered 3 proof-of-concept (PoC) apps in 4 months after 1 month of Python and ML training, with mentor guidance.
- Built a 36-month SARIMA avocado price forecast and an 11-module ERP dashboard with bcrypt login and LLM insights.
- Built an HR recruitment app (final project) that screens up to 10 PDF CVs and drafts job descriptions with an LLM.

Avocado forecast (demo, code) | ERP PoC (demo, code) | HR recruitment app (demo, code)

PROJECTS

Complaint Triage System – Mobile-Banking Review Triage (NLP) Oct 2026

Python, PyTorch, Hugging Face Transformers, FastAPI, PostgreSQL, LangGraph, Docker, Modal

- Cut reviews needing a manual check from 39% to 21% with a multi-task IndoBERT on 52,098 BRImo reviews.
- Beat a TF-IDF baseline on all 3 tasks (urgency macro-F1 0.853 vs 0.805).
- Deployed a FastAPI + PostgreSQL dashboard on Modal with a LangGraph text-to-SQL agent (read-only guard).

Live demo | Code: github.com/HachiVin/Complaint-Triage-System

ReguShield AI – Compliance Document Q&A (RAG) Oct 2026

Python, ChromaDB, FastEmbed, FlashRank, Groq, FastAPI, Docker, Streamlit

- Built a Q&A assistant for banking compliance documents that cites file and page, and refuses unanswerable questions.
- Combined BM25, vector search, reranking and OCR; raised LLM-judge correctness 0.63→0.94 and faithfulness 0.63→0.88 (8 questions).

Live demo | Code: github.com/HachiVin/regushield-ai

Predictive Maintenance System – Machine Failure Prediction Oct 2026

Python, scikit-learn, pandas, FastAPI, Docker, GitHub Actions, Streamlit

- Built a 24-hour failure warning (Azure PdM simulated data, 100 machines) that caught all 225 test failures at 99.5% precision.
- Served via a FastAPI REST API (batch check ~19× faster than one-by-one) with Docker, CI and data-drift monitoring.

Live demo | Code: github.com/HachiVin/Predictive-Maintenance-System

EDUCATION

Universitas Duta Bangsa Surakarta – Bachelor's Degree in Informatics Engineering 2022 – 2026

GPA: 3.85/4.00 *Surakarta, Indonesia*

- **Thesis:** TF-IDF vs Sentence-Transformer for perfume recommendation; Sentence-Transformer won a 30-user study (nDCG@3 0.912 vs 0.850).

SKILLS

ML & Deep Learning: Python, PyTorch, Hugging Face Transformers, scikit-learn, pandas, NumPy, statsmodels
NLP & LLM: Text classification, RAG, hybrid retrieval, reranking, Sentence-Transformers, LangGraph, text-to-SQL, OCR
MLOps & Data: FastAPI, PostgreSQL, Docker, GitHub Actions, drift monitoring, pytest, Git, Hugging Face Hub, Modal
Languages: Indonesian (native), English (TOEFL Prediction 590; EPT 750)

PUBLICATIONS

Aryanto, K. D. R. R., Nastiti, F. E., & Irawan, R. D. (2026). Comparison of TF-IDF and Sentence-Transformer NLP Methods for a Perfume Recommendation System Based on User Descriptions with Streamlit Visualization. *Proceeding of the IC-ITECHS*, 6(1), 149–160. doi.org/10.32664/fn1g4768

COURSES & CERTIFICATIONS

Junior Web Programmer (BNSP) – LSP Telematika Profesional Indonesia, valid until Jun 2029 Jun 2026

Build an AI Agent (IBM SkillsBuild x Hacktiv8); **Digital Skill Fair 55.0: Data Analytics** (Dibimbing) Oct 2026
